EDUCATION

Oregon State University - Bachelor of Science | Corvallis OR

Graduating June 2025

Double Major in Mechanical & Manufacturing Engineering | Minor in Mathematics

- **Club:** Sales Club, Sport Product Development, OSU 3D Printing, Chess Club
- **On-Campus Jobs:** McNary Dining Staff - 2021, Opens Lab Engineer - 2021, Summer Camp Staff - 2022
- **Extracurricular:** HTML, CSS, Python, Arduino, Electrical Device Repair

SKILLS

- **Technical:** 3D Modeling, Data Analysis, ANOVA & T-test, Lean Manufacturing Principle
- **Software:** SolidWorks, Fusion 360, Microsoft Office, Visual Studio Code, Arduino IDE
- **Language:** Fluent in English and Vietnamese

PROFESSIONAL EXPERIENCE

NASA Psyche Capstone Project – Mechanical Engineer | Corvallis OR

Jan 2025 - Jun 2025

- Led weekly team meetings, ensuring effective communication and alignment among 3 diverse teams, professors, and researchers.
- Adapted to evolving project needs and tight deadlines due to the broad scope of space exploration.
- Developed and tested an innovative method to collect extraterrestrial samples without landing.

Oregon Tool - Manufacturing Engineer Intern | Portland OR

Jun 2023 - Dec 2023

- Redesigned 29 components, reducing annual scrap costs by \$2,500 and ensuring 100% CAD accuracy through precise measurements and customers validation.
- Analyzed 30 million data points with cross-functional teams, resolving faults and increasing assembly line uptime by 15% using advance Excel.
- Saved \$3,000 in labor costs and prevented 90,000 cutter losses annually by identifying control failures with Cause maps and implementing A3-based preventive measures.
- Reduced machine downtime by 40% and boosted productivity by optimizing changeovers with Lean principles, minimizing part retrieval time.

Opens Lab - Mechanical & Manufacturing Engineer | Corvallis OR

Jan 2021 - June 2023

- Simplified manufacturing time by 95%, engineering a more efficient and cost-effective fluid flow monitoring device in collaboration with 7 students.
- Led soldering efforts as one of the top performers in lab, assembling 10+ electrical boards with high-precision components measuring as small as 0.4 mm, ensuring flawless performance and zero water leakage during testing, all while promoting team development and quality assurance.

Thai Duong Rubber Plastic – Maintenance | Vietnam

Jan 2019 - Nov 2019

- Maintained 20 heating machines and operated sawing machines and drillers, ensuring smooth operations and diminishing downtime by 15% through regular cleaning and preventive maintenance.
- Resolved mechanical failures by identifying root causes and safely managed 20-80 lbs of products, enhancing operational efficiency and reliability in material handling.

HONOR & AWARD

- **Continuation Scholarship & OSU Regional Award** | OSU, 2020 - 2024
- **Top 20 Water Rocket Competition in Ho Chi Minh city** | Vietnam, 2018
- **Silver Medal in Physics Olympic Competition 30/4** | Vietnam, 2017
